EDUCATION

Bachelor of Technology in Computer Science

Maharaja Surajmal Institute of Technology

Janakpuri, Delhi, India

Oct. 2023 – Present

EXPERIENCE

SDE Intern

Zelosify

Jul. 2025 - Present

Remote, Tamil Nadu, India

- Worked on a full-stack application, contributing to various dashboards. I improved workflows and data management for users by integrating different technologies, making the projects more secure and efficient.
- Contributed to the development and enhancement of multiple dashboards using Next.js, Node.js, and PostgreSQL, improving data management and user workflows.
- Integrated Amazon S3 for secure PDF submissions by programmatically generating unique S3 keys, ensuring efficient and reliable file handling.
- Implemented user authentication and role-based access control with Keycloak to manage user sign-ins and permissions across different dashboards.
- Explored and integrated LLMs to improve developer productivity, including automatic ER diagram generation for database understanding.

TECHNICAL PROJECTS

- **Career Compass** | *ReactJS, Firebase, MongoDB, Express* Sept 2024
 - Developed a career guidance platform with AI tools, roadmaps, and productivity techniques.
 - Guiding roadmaps of 500+ careers.
 - Created an admin panel using Node.js and Express to manage registrations and data.
 - Built an interactive UI with React.js and Framer Motion, including profile and pagination features.
- **SPARK** | *NextJS, PostgreSQL, Cloudinary, Prisma, Express, Node* Aug 2025
 - Built a Eventria service to connect users with hackathons, events, internships, and open-source projects.
 - Developed social posting features like Twitter for promotions and engagement using PostgreSQL for data storage and Cloudinary for media handling.
 - Implemented Nextjs authentication, registration workflows with Node.js/Express.
 - A Pitchpal service that generates presentations (PPTs) from project ideas and provides a score and feedback on uploaded PPTs to assess their quality.
- **BulkMailer** | *NextJS, Express, Node* May 2025
 - Developed a bulk email sender in Next.js that allows users to write custom HTML/CSS email content, preview the styled output, and send the final result to multiple recipients.
 - Integrated NodeMailer with Google SMTP and used DOMPurify to securely process and render HTML bodies.

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript, Typescript, Java, HTML, CSS, SQL, Python
- **Technologies/Frameworks/Libraries:** Node.js, Express.js, React.js, Next.js, Prisma, shadcn/ui, Redux, REST APIs, JWT, Bcrypt, Bootstrap, TailwindCSS, Framer- Motion, Material-UI, Mongoose-ODM.
- **Database:** PostgreSQL, MongoDB, MySQL, Firebase
- **Developer Tools:** Git, Cloudinary, AWS, Vercel, Netlify, Render, Figma, VS Code, Postman, GitHub Actions.
- **Soft Skills:** Leadership, Adaptability, Team Work, Problem Solving.

LEADERSHIP & ACHIEVEMENTS

- **Google Developers Group on Campus (GDGoC) – MSIT:** Head of Development Department (2024–2025) and Advisor for the entire society (2025–2026)
- **Geek Room – MSIT:** Head of Development Department (2025–2026)
- **Hackathon Contributions:** Organized and developed websites for several national and global hackathons, including Code Cubicle 5.0, Code--Manipal, Pears Global Hackathon, Code Kshetra 2.0 (with MLH), and Code Cubicle 3.0.
