EXPERIENCE

Software Developer

Aug. 2026 - Present

Flickly

Remote, Gurugram, India

- Built a content management system for case studies, playbooks, thought leadership, videos, and newsroom content, with admin editing, previews, and publishing workflows.
- Developed AI survey question scoring and improvement suggestions across the Next.js app and Python agent, including scoring rules, LLM evaluation, caching, and tests.
- Implemented admin controls for survey analytics access, user impersonation, and invitation management.
- Improved public-page SEO with metadata, canonical URLs, structured data, and sitemap updates.

SDE Intern

Jul. 2025 - Sept. 2025

Zelosify

Remote, Tamil Nadu, India

- Developed and enhanced full-stack dashboard features using Next.js, Node.js, and PostgreSQL, improving user workflows and data management.
- Integrated Amazon S3 for secure PDF uploads with dynamic S3 key generation and efficient file handling.
- Implemented authentication and role-based access control using Keycloak across multiple dashboards.
- Explored and integrated LLM-powered tools, including automatic ER diagram generation for improved database understanding.

TECHNICAL PROJECTS

- **Presora** | *NextJS, FastAPI, Cloudinary, PostgreSQL, SQLAlchemy, Redis, Celery, Keycloak, Docker* Aug 2025
 - Developed a prescription safety platform for hospitals, doctors, and patients with secure role-based access control.
 - Built a medicine intelligence engine leveraging a 250K+ medicine dataset, PostgreSQL trigram search, and fuzzy matching for real-time autocomplete.
 - Designed patient health records, medication history, allergy tracking, and prescription management workflows.
 - Implemented TOTP-based multi-factor authentication and consent-driven patient record access for healthcare-grade security.
- **Launchly** | *Next.js, PostgreSQL, Prisma, Redis, BullMQ, Node.js* Apr 2026
 - Built a full-stack deployment platform that lets users connect GitHub repositories, configure environment variables, and deploy apps on live subdomains.
 - Designed an asynchronous deployment pipeline using Redis + BullMQ, with worker-based processing for cloning, installing, building, and starting runtimes.
 - Implemented runtime detection for Next.js, Node.js, and static projects, along with health checks, status tracking, and live deployment logs.
 - Developed subdomain-based routing and a dashboard to monitor deployment status, logs, and live URLs.
- **Career Compass** | *Next.js, PostgreSQL, Prisma, Firebase, Node.js* Sept 2024
 - Developed a career guidance platform with AI tools, roadmaps, and productivity techniques.
 - Guiding roadmaps of 500+ careers.
 - Created an admin panel using Node.js and Express to manage registrations and data.
 - Built an interactive UI with React.js and Framer Motion, including profile and pagination features.

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript, Typescript, HTML, CSS, SQL, Python
- **Technologies/Frameworks/Libraries:** Node.js, Express.js, React.js, Next.js, Prisma, shadcn/ui, Redux, REST APIs, JWT, Bcrypt, Bootstrap, TailwindCSS, Framer- Motion, Material-UI, Mongoose-ODM.
- **Database:** PostgreSQL, MongoDB, MySQL, Firebase
- **Developer Tools:** Git, Cloudinary, AWS, Vercel, Netlify, Render, Figma, VS Code, Postman, GitHub Actions.
- **Soft Skills:** Leadership, Adaptability, Team Work, Problem Solving.
